# WRTH INTERNATIONAL RADIO SCHEDULES - MAY 2016

## Notes for the International Radio section

Country abbreviation codes are shown after the country name. The three-letter codes after each frequency are transmitter site codes. These, and the Area/Country codes in the Area column, can be decoded by referring to the tables in the at the end of the file.

Where a frequency has an asterisk (\*) etc. after it, see the 'KEY' section at the end of the schedule entry.

The following symbols are used throughout this section:

- † = Irregular transmissions/broadcasts;
- ‡ = Inactive at editorial deadline;
- ± = variable frequency;
- + = DRM (Digital Radio Mondiale) transmission.

## CLANDESTINE AND OTHER TARGET BROADCASTS

**Clandestine Broadcasts** (Clan) are politically-motivated broadcasts produced by groups opposed to the government of the target country.

**Other Target Broadcasts** can be produced by either governmental or non-governmental organisations, and are targeted at zones of regional or local conflict. Most COTBs are transmitted via the facilities of international transmitter operators.

The following symbols are used in this section: † Irregular transmission; ‡ Inactive at time of publication; ± Variable frequency. Where a station is no longer broadcasting on MW or SW, the inactive symbol (‡) appears next to the station name (the station may be continuing to broadcasting via satellite or internet).

Site codes found in the schedules section of this release can be decoded by using this table. The sites shown in the above table were active during the current broadcasting season. Sites that are currently inactive have not been listed. Lat/Long of transmitter sites are shown to the nearest minute. For greater detail, including numbers and powers of installed transmitters for any given site, please see the printed edition of WRTH.

Where a '✓' is shown in the 'MW' column, this indicates the site has Mediumwave &/or Longwave transmitters (with a frequency coverage in the range 0.15-1.75MHz) installed.  
If there is a '✓' in the 'SW' column, the site has Shortwave (i.e. a frequency coverage in the range of 2-26MHz) capability.

If either column has a '✗', that site does not have transmitters installed that cover the range indicated.
